PROJECT NAME	<b>Signs With Smart Connectivity For Better Road Safety</b>

## **IBM Watson IoT Platform :**

Watson IoT Platform is where you can set up and manage your connected devices. IBM's Bluemix platform is the place to quickly and easily create applications that can use real-time and historical data from your connected devices.

This service is the hub for IBM Watson IoT and lets you communicate with and consume data from connected devices and gateways. Use the built-in web console dashboards to monitor your IoT data and analyze it in real time. Then, enhance and customize your IBM Watson IoT Platform experience by building and connecting your own apps by using messaging and REST APIs.

## Features:

User, machine and system-generated data, including speech, text video and social Sentiment. You need contextual insight for truly cognitive iot applications
